Providing SPV support and services for military cooperation exercises

Situation

Since 2011, the US and Moroccan Militaries have engaged in bi-annual, bilateral exercises aimed at improving interoperability and a mutual understanding of country's tactics, techniques, and procedures. A reliable SPV platform was required to support the operation on a regular basis.

Solution

As a DLA Prime Vendor, our comprehensive supply chain and expert logistics team has extensive experience delivering operational support with both subsistence and fresh food items. Our nine mobility centers allow for a completely integrated procurement, transportation, and distribution system that enables rapid and precise deployment.

Result

Part of providing efficient and effective SPV support, we worked closely with DLA Troop Support, the American Embassy in Rabat, and the US African Command-sponsored Marine Forces to deliver directly to Tan-Tan and other critical locations.
